VEERUM

Senior JavaScript Developer

Who we are

VEERUM is built on honesty, creativity and curiosity. We strive to be a leader in innovation, providing an energy and commitment that's unmatched for the clients we service. We are a team of successful leaders who work hard and are passionate about bringing clarity to large-scale capital projects, and we're disrupting the way industrial construction projects are delivered.

Who we are looking for

We are seeking a full-time Senior Full-Stack Developer to join the VEERUM team. We are looking for a collaborative, client-focused addition to our team. We want someone who can support our internal values and deliver external excellence, putting into practice the peace of mind that comes with VEERUM technology.

You'll be an integral team member, working closely with other development team members to engineer VEERUM's technology stack, with a primary focus on our API. As a senior developer you will be responsible for mentoring and assisting other development team members as well as assisting with system architecture and design.

Why we're looking

By 2030 the world needs to spend **$94 trillion on infrastructure** to meet world demand. Currently, 90% of infrastructure projects go over budget resulting in approximately $1.6 trillion in waste each year. VEERUM is a SaaS platform to solve this problem at a fundamental level, and we're looking for people to continue to be on the front lines of the solution.

Responsibilities

- You bring a systems level approach to software design and are a team player that leads by example.
- You have a desire to coach and mentor a team of developers.
- You approach all projects as a critical thinker, and you focus on solution.
- You're dedicated to being a curious person, committed to improving yourself and the team

Qualifications

MUST HAVE EXPERIENCE

- 6+ years of professional software development experience with a demonstrated proficiency in JavaScript, including JavaScript libraries: Node, Express
- Demonstrated ability in multiple programming languages
- Ability to evaluate and learn new JavaScript libraries.
- Experience with database technologies (MongoDB, PostgreSQL and Neo4J)
- A desire to mentor and lead other developers
- Architect RESTful APIs, including testing and tuning
- Testing front end applications, preferably with Jest/Enzyme
- Experience with CI/CD tools (e.g. Jenkins, CircleCI, Travis)

- Experience with version control systems (preferably Git)
- Experience with design and implementation of microservices

NICE TO HAVE EXPERIENCE

- DevOps tools and practices, especially the Hashicorp technology stack
- Agile/Scrum
- Docker
- AWS
- CircleCI
- JavaScript libraries: React, Webpack, Bootstrap
- A degree in Computer Science or related field. Relevant experience will also be considered.

What we'll bring to the table

VEERUM is gaining traction on projects worldwide with our leading-edge solutions. We strive to drastically reduce waste while increasing human safety at the worksite. Projects using VEERUM's Digital Twin are delivered on schedule, on budget with improved safety. We focus on our clients' needs and wants in order to contribute to the development of global infrastructure and build a better world.

VEERUM works in the blossoming technology industry in Calgary, AB. We value sharp thinkers, self-motivators, strong communicators, positive energy, and honest judgment. We hire based on these characteristics and nurture an environment where innovation and individuality are not only appreciated but encouraged. We strive to give you the tools, training, and work environment to do your best every day.

VEERUM offers a work environment that's both challenging and rewarding:

- Flexible working hours
- Great people who enjoy working together
- Variety and diversification of role
- Employee benefits package

TO APPLY:
